INDUSTRIAL FRIGO IS A FAMILY

TODAY, ALL OVER THE WORLD INDUSTRIAL FRIGO ICE MEANS
PERFORMANCE AND QUALITY IN THE ICE & SNOW BUSINESS

A worldwide leading company, specialized in the production of cooling systems for a wide range of industries. Founded in 1970, Industrial Frigo includes four foreign branches and a worldwide sales and assistance network.

Thanks to our extensive experience, we were able to develop also the **ICE & SNOW INDUSTRY** carrying out an extensive and customized variety of solutions such as: figurative ice skating rink, regulation NHL size rinks, different types of ice slides, ice tracks for speed skating, mini ice cars and ice bumper cars, curling lanes and much more. Each rink project can be tailored to customer specifications: purchase or hiring, for indoor or outdoor set up, we even offer solutions for tropical climates. We are proud to use green technology and

we save more than 150 tons of CO₂ using the power produced by highly efficient solar panels. When it comes to cooling systems, we don't subcontract chillers, we are manufacturers and make some of the best cooling machines.

Our company have been producing state of the art, energy efficient cooling systems since 1970. We ensure that your **ICE & SNOW PROJECT** has the right system for the application so that you have enough capacity but use the least energy possible. Good for the environment and great for minimizing your costs.

5 ICE RINK

Ice rinks can be installed anywhere. Many of our ice rinks are installed during Christmas Eve in parks, shopping malls, zoological gardens, etc, but also as entertainment for weddings, birthdays or any special occasion / event where people want to have fun on ice.

Las pistas de hielo pueden instalarse en cualquier sitio. Muchas de nuestras pistas de hielo se instalan durante la temporada de fin de año en parques, centros comerciales, zoológicos, etc., pero también se pueden instalar como entretenimiento en bodas, cumpleaños o cualquier ocasión o evento especial donde las personas quiera divertirse en el hielo.

MAIN COMPONENTS

CHILLERS

We manufacture our own chillers which are made for ice rinks specific scope. The refrigerant gases we use meet the rigid Community's environmental commitments.

Fabricamos nuestros propios enfriadores, diseñados específicamente para las pistas de hielo. Los gases refrigerantes utilizados cumplen con la exigente normatividad medioambiental de la Comunidad Europea.

SUPER ICE MODULES

Patented & Innovative: Industrial Frigo Ice offers a wide range of ice rinks in all shapes and sizes. Polyethylene tubes, easily assembling by with GRUVLOCK fittings. LPDE: a new material that mixes flexibility and resistance.

Patentado e innovador: Industrial Frigo Ice ofrece una amplia gama de pistas de hielo en varias formas y tamaños. Uniones de mangueras de polietileno de fácil montaje mediante accesorios GRUVLOCK.

LDPE(low density polyethylene): Nuevo material utilizado en nuestras pistas que mezcla flexibilidad y resistencia.

BARRIERS

Choose your most suitable barriers :

- PROFESSIONAL ASTM F24 – IIHF AGREED
- POLYETHYLENE
- POLYCARBONATE
- WOOD

ICE RINK OUTDOOR

In winter time, ice rinks can run easily outdoor as well. We provide also the insulation sheets in order to protect the floor and if necessary the catching pool to contain the melted ice.

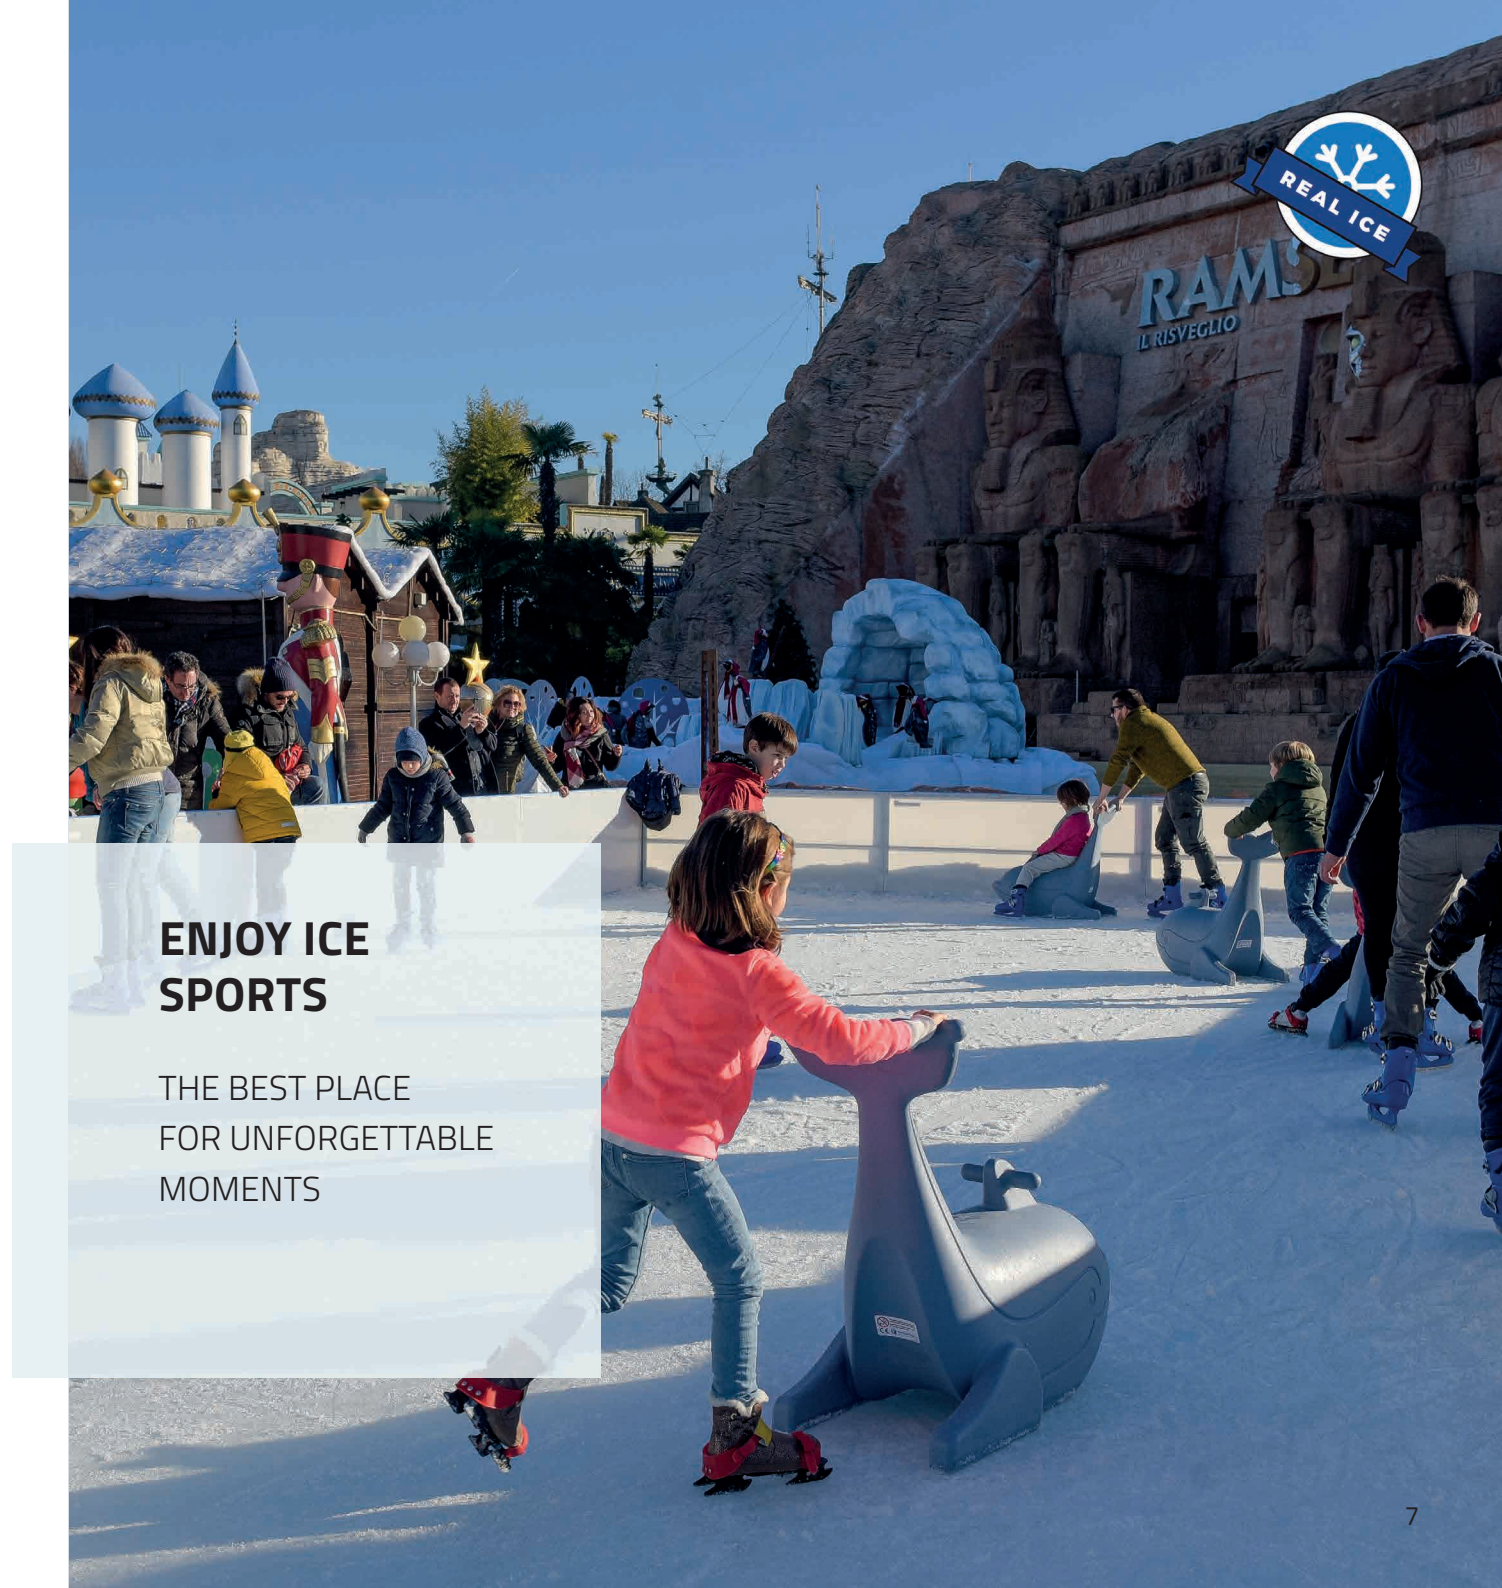

We have a wide range of different sizes to perfectly fit into the buildings available spaces.

Our professional service team takes care of the installation, training and after sale support.

En la temporada invernana, las pistas de hielo pueden instalarse también sin problema al aire libre. Suministramos las láminas de aislamiento para proteger el suelo y si es necesario, la piscina de contención para el hielo derretido.

Disponemos de una amplia gama de tamaños diferentes para encajar perfectamente en los espacios disponibles en las instalaciones.

Nuestro equipo de servicio profesional se encarga de la instalación, la capacitación y el soporte postventa.

ECO FRIENDLY

HOW IT WORKS

PERMANENT FLOW OR TEMPORARY SNOWFALL

The snow falls coming out from the machine, remains on the floor where it melts due to ambient temperatures. The installation is very easy cause it just needs electrical power and water supply and it can work in a indoor or outdoor set.

SNOWVOLUTION is available as a stand alone unit or as a modular system where the machine can be placed along a **SKI SLOPE**.

COMO FUNCIONA

FLUJO CONSTANTE O CATARATAS DE NIEVE TEMPORALES

La nieve sale la máquina y permanece en el suelo donde se derrite debido a la temperatura ambiente. la instalación es muy sencilla ya que solo necesita energía eléctrica y un suministro de agua, además puede funcionar en interiores o exteriores.

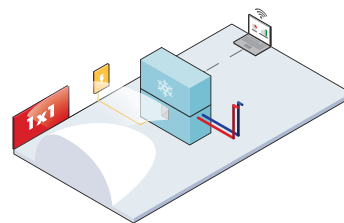

SNOWVOLUTION está disponible como una unidad independiente o como un sistema modular donde la máquina se puede colocar a lo largo de **SKI SLOPE**.

ON A SLOPE

3 SKI SLOPE

We design customized slopes indifferent lenghts and widths. Small and gentle hill for kids or high and adrenaline for the most daring athletes who will compete with jumps and acrobatics.

Diseñamos rampas personalizadas en diferentes longitudes y anchos. Colina pequeña y suave para niños o alta extremas para los atletas más atrevidos que competirán con saltos y acrobacias.

SKI SLOPE

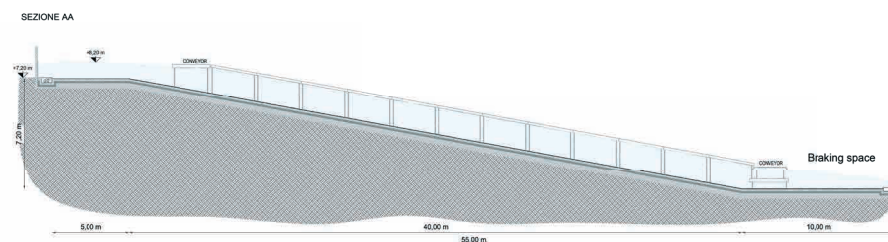

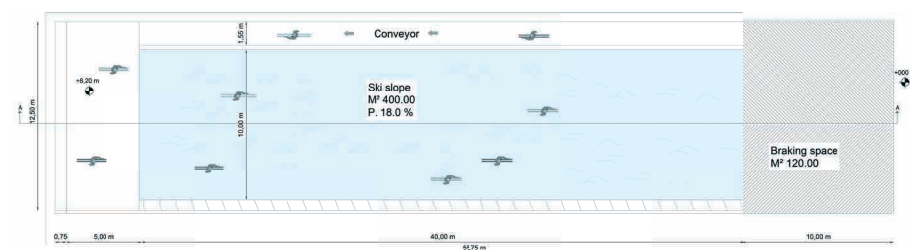

Ski Slope is a gentle downhill experience that can be used as a practice field. People can challenge themselves locking their boots onto a true ski run.

The ski slope can be equipped with a conveyer or belt for skiers to lift up.

We supply permanent indoor snowhills or portable ones for temporary events. Thank to its high versatility, customers can choose the most performant machine in a wide range of solutions.

Ski Slope es una experiencia de descenso suave que se puede utilizar como un campo de práctica para esquiadores. Las personas pueden desafiarse a sí mismas asegurando sus botas en un esquí real de competencias. La pista de esquí se puede entregar con una cinta transportadora para llevar los esquiadores a la cima.

Suministramos colinas de nieve interiores permanentes o portátiles para eventos temporales. gracias a su versatilidad, los clientes pueden elegir la máquina más eficiente en una amplia gama de soluciones.
